

Meat Industry Analytical Testing

*Meeting Regulatory & Quality Requirements
Through Validation & On-going Verification*

NATA Accredited for Chemistry, Microbiological and Residue Testing

Meeting the regulatory and customer requirements of meat testing can ensure the safety of consumers, as well as the quality of the meat products tested.

Symbio Laboratories has built a strong reputation as one of Australia's largest independent laboratory providing analytical and testing services to help processors meet their testing requirements for residue, chemical, microbiological, nutritional and environmental analyses.

For fast and reliable quality results, let Symbio Laboratories assist you with all your quality assurance and product specification testing needs.

Partner with a laboratory you can trust

Partnering with Symbio Laboratories means all your requirements are covered and backed by friendly, experienced and qualified staff to answer any questions you might have.

Symbio Laboratories is NATA accredited and Department of Agriculture and Water Resources (DAWR) approved for all meat industry tests. Our approvals include DAWR screening, verification and full confirmation testing for E.coli O157 and STEC.

With state of the art testing equipment, we can cater for all your microbiological, chemical and residue testing requirements including:

- Carcase swabs
- Contact surface swabs
- Raw meat products
- Cooked meat products
- Meat and bone meals
- Potable and non-potable waters
- Effluent discharges
- Product shelf-life
- Nutritional panels
