# Sap and Dry Tissue

**From 1<sup>st</sup> March 2026, Hortus and Symbio Laboratories will no longer offer SAP or DRY TISSUE testing.**

We advise customers who rely on SAP or DRY TISSUE (also commonly called PLANT TISSUE) testing to contact **EAL** - Environmental Analysis Laboratory - in Lismore NSW. EAL may be able to quote and provide similar packages for your Sap and Dry Tissue testing needs.

## SAMPLE SUBMISSION QUICK GUIDE

Step 1: Contact our Customer Service team at [admin@symbiolabs.com.au](mailto:admin@symbiolabs.com.au) or 1300 703 166 to setup your account with Symbio.

If you're an existing Hortus customer, we may already have your details on record.

For new customers, we will need your business and contact details to create a new account.

Step 2: For sample submission, we recommend using the Hortus ARF (Analysis Request Form). The customer service team can provide an ARF template during account setup.

Step 3: Ensure your sample has been collected in accordance with the sample requirements including the required weight or volume of sample materials.

ALL samples must be clearly labelled and should be accompanied with ARF paperwork with sample and testing details, contact details (including email & phone) to avoid delays in testing.

Step 4: For fastest turnaround, we recommend sending your Hortus samples directly to our parent lab Symbio Laboratories (Brisbane):

**Australia Post or Courier**

Symbio Laboratories  
52 Brandl St  
Eight Mile Plains QLD 4113

**Samples can also be dropped at the Toll / TeamGE office in Bundaberg**

110 Enterprise Street  
Svensson Heights QLD 4670

**IMPORTANT:** Microbial water samples should be delivered same-day; or post/courier microbial water samples should be frozen and packaged in cooler box.

We recommend sending sensitive samples at the start of the week to avoid transit delays.
